

The Lupus Nexus is a unique resource that aims to accelerate precision medicine in lupus.

The Lupus Nexus brings the following value to patients and researchers, with unprecedented access to deep datasets and powerful tools to help develop new treatments, slow disease progression, and improve the quality of life for those living with lupus.

No lupus resource of this breadth and depth is currently available to the research community.

**PATIENTS**

- Longitudinal registry and biorepository with ClinROs and PROs
- Diverse demographic enrollment of 3,500 participants over five-years
- Targeted cohorts: new onset, active lupus nephritis, extra-renal flare and prevalent cases

**DATA**

- Highly curated clinical and emerging diagnostic data
- U.S. Food and Drug Administration (FDA) data standards and systems interoperability
- Return of raw data from all analyzed samples to the platform

**SAMPLES**

- More than 10 unique biospecimen types
- More than 1 million biospecimens
- Use of best-in-class analysis labs

**ACCESS**

- Participant portal for return of study results with educational support
- Clinician and researcher portals for real-time access
- Cloud-based data storage and native analytical tools
